

## FEBRUARY 15 & 16, 2019

### INDIVIDUATION AND THE WILD WOMAN ARCHETYPE

Why do we go through the process of individuation? What is the value of the struggle and suffering? Why do we suffer? We explore these questions as a way to help us connect with our wild, authentic nature — our individual unique way of being in the world and sharing our individual gifts. And, ultimately, as a way to live a meaningful life.

#### Saturday Workshop

“The workshop will retell the story of Eros and Psyche, love and soul. The tale is about learning the four impossible tasks, completing the arduous journey to Hades and back and then eventually, the coniunctio or sacred marriage of the pair.

We break down these tasks as a compass for your personal individuation journey and through the lived experience of relationship and loving.”
